

Chapter 10 : Learning area and perimeter

Curricular Goal :

CG 4 The goal of this lesson is to enable the students to develop understanding of perimeter and area for 2D shapes and use to solve day to day problems.

Competencies :

CG 4.1 The students should be able to discover, understand, and use formula to determine the area of a square, and formulate strategies to find the areas of composite 2D shapes.

Learning Outcomes :

At the end of the chapter children will be able to calculate the area and perimeter of the rectangle.

CHAPTER 10

LEARNING AREA AND PERIMETER

ACTIVITY

Q.1. Find the area and perimeter of the square given below :

Q.2. Find the number of tiles of dimension $2\text{m} \times 2\text{m}$ required to floor a rectangular room of dimension $6\text{m} \times 4\text{m}$.
